- html & css course - Udemy, [Cert Link](#)
- Flutter Workshop - Insight 2024 Techfest

ACADEMIC PROJECT

Title: Waste management and Recycle product sell app

Rank : Excellent

Summary/Description: The Waste Management and Recycle Product Sell App helps users manage waste, recycle materials, and buy or sell recycled products. It promotes sustainability by connecting eco-conscious individuals and businesses.

Title: Solar Flare

Rank : Excellent

Summary/Description: Conducted in-depth research on solar flares, focusing on their causes, impact on space weather, and potential effects on Earth's communication systems and satellites. By analyzing scientific data and running simulations, I modeled solar flare behavior, contributing to a deeper understanding of solar activity and its influence on modern technology.

PERSONAL PROJECT

- Bitcoin app**
 - developed a bitcoin app using flutter/dart for the front-end, Integrated CoinGecko API to fetch real-time bitcoin price data and other cryptocurrency statics for accurate, up-to-date informations.
- trivia app**
 - A mobile application designed to provide users with engaging trivia questions across various categories and difficulty levels. Developed using Flutter and Dart for the front-end, integrated with a Trivia API in back-end.

LEADERSHIP ROLES

- Insight Tech Fest Student Coordinator(2023)**, Calicut University

LANGUAGES

Malayalam, English
