

Lamiya Kasim

Backend Developer

+917510303350 ◇ lamiyakasim9@gmail.com ◇ India ◇ [linkedin.com/in/lamiyakasim](https://www.linkedin.com/in/lamiyakasim)

SUMMARY

Motivated backend developer with experience in PHP Laravel, building RESTful APIs, and managing MySQL databases. Contributed to real-world projects, focusing on scalable solutions, optimized performance, and AWS deployment.

EXPERIENCE

Backend Developer intern

Feb '25 — Present

ENV Creations

- Developed and maintained web applications using PHP Laravel framework. Built and integrated RESTful API's to enable seamless communication between frontend and backend services.
- Collaborated with the development team to troubleshoot and resolve application issues.
- Contributed to real-world projects, enhancing functionality and optimizing backend performance.
- Assisted in designing and implementing scalable backend solutions for client applications.

EDUCATION

Information Technology in , College of Engineering Thalassery (GPA: 7.1)

PROJECTS

Wedding Dress Rental App

- Developed a wedding rental application using Android Studio and Java for the frontend, with Python Flask as the backend framework.
- Integrated MySQL as the database to manage customer, inventory, and booking data.
- Designed and implemented RESTful APIs using Flask to enable seamless data exchange between the app and the backend.

Expense Tracker web Application

- Designed and built a responsive expense tracker using HTML, CSS, JavaScript, and Bootstrap for the frontend.
- Utilized Python Flask as the backend and MySQL to store user expense records and generate analytics.
- Enhanced user engagement by implementing dynamic charts for monthly spending trends.
- Ensured secure user authentication and data storage practices.

Blood Donation Management Web Application

- Created a blood donation management web application using PHP, MySQL database, and XAMPP server.
- Implemented efficient donor registration, inventory management, and blood request handling.
- Designed an intuitive user interface to facilitate quick access to blood bank information and ensure seamless user experience.
- Leveraged XAMPP to streamline local development and testing.

SKILLS

Languages Java, C, Python, PHP, HTML, Javascript, SQL

Frameworks Laravel, Django, ReactJS

Cloud/Database Mysql, AWS

CERTIFICATIONS

Foundations Data Data Everywhere, Google

30 days of Google cloud program, Google Cloud

Introduction to cloud computing on aws,, Udemy
