SUMMARY

- Proficient in Java programming language for developing robust applications and automation scripts using Selenium WebDriver.
- Skilled in writing efficient test cases and suites using TestNG framework for comprehensive testing of web applications.
- Experience in utilizing Jira for issue tracking and project management, ensuring seamless collaboration within development teams.
- Familiar with HTML for web page structure and content presentation, enabling effective interaction with web elements during automation testing.
- Knowledgeable in SQL for database querying and manipulation, facilitating data-driven testing and validation processes.

SKILL SET

- Java
- Selenium web driver
- TestNG
- Jira
- SQL
- HTML
- Data Driven
- Cucumber

EDUCATION DETAILS

Bachelor of Engineering in ECE | 2019-2022|

- Mahendra Engineering College, Namakkal Tamil Nadu Anna University,

TRAININGS

Green Technology | Jan 2022- April 2022|

- Completed comprehensive training classes in Java, Selenium, TestNG, and Jira, gaining practical skills in software development and quality assurance methodologies.
- Demonstrated proficiency in applying Java, Selenium, TestNG, and Jira in real-world scenarios, particularly in e-travel and e-commerce domains, ensuring efficient testing and project management practices.
- Utilized expertise in Java, Selenium, TestNG, and Jira to enhance professional capabilities, contributing to successful project deliveries and driving continuous improvement in software development processes.

WORK EXPERIENCE

Infosys Pvt. Ltd. India | June 2022 – July 2023|

- Involved in Automation Framework Development implementing Page Objects Model, Maven Selenium Web Driver –Java, TestNG.
- Identifying the testcases which needs to be automated and which cannot be automated.
- Prepare the Automation script with Selenium Java using TestNG framework.
- Creating Test cases using element locators and Selenium Web driver methods.
- Regression script execution and analyze the results.
- Implementation of Data driven framework.
- Reporting the bugs to development team and analyzing issues Debug and fix the Script issues.
- Experienced in attending the status calls and reporting to the clients.
- Client interaction via email or conference calls on a regular basis.
- Analyze the changes in the new build and update it accordingly.
- Having experience in TestNG, Junit, POM and Data driven frameworks.
- Good in preparing the Selenium automation test scripts with java for automating the web-based applications for the given user stories.
- Having Experience in preparing and developing Automation Test Scripts and Test Cases.
- Good in understanding User stories and analyzing them
- Ensure to execute test cases prepared for testing Software builds on the mobile platform.
- Perform daily quality checks as per established guidelines and report deviations accurately.
- Understand and ramp up on testing procedures, guidelines and policies for new devices and apply the same in day-to-day work.
- Use software tools for validation, analysis and data capture on a daily basis.
- Be comfortable with capturing results, communicating and escalating failures and providing status reports.

Kingston Holdings FZC |UAE| SEP 2023- NOV 2024|

- Supervise daily production activities for PVC electrical conduit manufacturing, ensuring optimal machine performance and adherence to production schedules.
- Coordinate with the maintenance team for timely inspections and repair of extrusion machinery and electrical systems.
- Monitor quality assurance tests, ensuring pipes conform to electrical specifications and industry standards.
- Ensuring raw materials availability and managing stock levels.

- Maintain detailed production logs and inventory records to track progress and identify areas for improvement.
- Implement lean manufacturing practices, reducing waste and improving production efficiency by 10%.
- Assisted the production supervisor in managing day-to-day operations, including scheduling shifts and maintaining production targets.
- Troubleshoot mechanical and electrical problems in production lines to minimize downtime.
